

DEEKSHA VERMA

Fullstack Developer

Email: v.deeksha@yahoo.com | Phone: +91-8989530466 | LinkedIn: <https://www.linkedin.com/in/deeksha-verma-835209150>

Summary

Fullstack Developer with 5.1 years of total experience in building **scalable, high-performance web applications** using **React.js** and **Vue.js** and 2 years of backend experience developing **RESTful APIs** with **Node.js** and **NESTJS**. Strong expertise in **component-based architecture**, **state management**, **performance optimization**, **WCAG accessibility compliance** and troubleshooting performance issues. Highly detail-oriented, focused on clean and maintainable code, problem-solving, and driving continuous improvement.

Core skills & Technologies

- **Frontend:** React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind, Redux Toolkit, Vue.js, Pinia, Material UI, Responsive Design
- **Backend:** Node.js, NestJS, MongoDB, REST APIs
- **Performance & Tooling:** NPM, Webpack, Vite, Babel, Postman, Chrome DevTools, Git, CI/CD, Azure DevOps, GitHub Copilot
- **Testing:** Jest, Vitest, React Testing Library
- **Soft Skills:** Teamwork, Mentorship, Communication, problem-solving

Experience

Application Developer / Fujitsu Consulting India Pvt. Ltd, Pune (Maharashtra) / 08/2023 – Present

- Developed and optimised scalable **React.js applications** using **Vite, JavaScript (ES6+)**, improving performance through **lazy loading**, **code splitting**, **memoization** and **tree shaking**, resulting in a 44% increase in **Lighthouse** performance scores.
- Led the migration of 80%+ of the codebase from **React 16 to React 18**, reducing **bundle size** by 15% and improving **page load** performance by 25%.
- Designed scalable state management with **Redux Toolkit**, improving **maintainability** and reducing **code complexity** by 25%.
- Ensured **WCAG 2.1 accessibility standards**, improving **ARIA support**, keyboard navigation, and semantic HTML, achieving a 95% **accessibility audit score**.
- Implemented **WebSockets** for real-time features, enhancing the applications **responsiveness** and **user experience** by 40%.
- Enforced code quality across the React codebase with **ESLint**, resulting in a 21% reduction in code review.
- Used **Git-based workflows** and supported **CI/CD pipelines** for smooth releases and deployments.
- Collaborated with backend teams to integrate **REST APIs** and **AI-Powered APIs** (**Azure OpenAI GPT** and **Google Gemini**) into the UI components.

Senior Member of Technical Staff / Centre for Computational Technologies Pvt. Ltd., Pune (Maharashtra) / 02/2021- 08/2023

- Built a **scalable** React application with **modular architecture** supporting 30+ **reusable** components.
- Implemented unit tests using **Jest** and **React Testing Library**, increasing code coverage by 60% and reducing production bugs by 40%, ensuring **higher code quality and maintainability**.
- Used common front-end development tools such as **Babel, Webpack, NPM** which reduced build time by 30%.
- Integrated **MongoDB** for data storage and implemented JWT-based authentication using **Passport.js** and **JSON Web Token**, ensuring secure API access.

Software Development Intern / Centre for Computational Technologies Pvt.Ltd, Pune (Maharashtra) / 07/2020 - 01/2021

- Built and maintained user interfaces using **React.js**, including creating components, managing state, utilizing **React hooks**, and implementing **React Router** for efficient navigation.
- Collaborated with cross-functional team to streamline workflows, improving overall project efficiency.

Projects

AI-Powered Zinrai Translation Application (Japan)

- Built a high-performance multilingual translation application with DeepL API integration, delivering 90% accurate translations.
- Optimized rendering of large dictionary datasets (10k+ records) using React virtualization libraries, ensuring fast load times and smooth scrolling.
- Improved user productivity by reducing manual editing through AI-driven rewriting and word-suggestion features.

First Dimension Application (Florida,US)

- Implemented features to balance indoor air quality (IAQ) and occupant thermal comfort, ensuring system designs support health, well-being, and regulatory compliance.
- Automated HVAC calculations and reports to help engineers achieve a balance between energy efficiency and occupant well-being.

Certifications

Udemy: [Complete React and NextJS course with AI powered Projects](#) – 01/2026

Udemy: [Node.js- Beginner to Advance course with projects](#) – 01/2026

Udemy: [Github Copilot Beginner to Pro – AI for Coding and Development](#) – 10/2025

Education

07/2014 - 05/2018

Bachelor of Engineering - Computer Science

Sakshi Institute of Technology and Management, Guna (M.P.)
